

SMOK

Volvo serie 60 2010-... (S60,V60,XC60) DDM/PDM Module Millage Correction. :

We added option Read Km from DDM and PDM modules:

- CEM
- DDM
- PDM

Some Volvo cars have stored millage in doors models (Driver and passanger) You can check millage in car by OBD with option DDP/PDM with UHDS Tool.

Option for read km is free of charge for all users UHDS.)

If DDM/PDM modules contain millage thenif we not change millage init then after some time millage come back to original state (for example after 1 month)

sometimes millage come back after drive many kilometers >5000km

Best solution is change km in DDM/PDM and never original km back.

Best solution is change km in DDM/PDM and never original km back.

For change millage in doors module we have to do:

-Read by OBD Flash and EEprom from DDM and PDM modules

-Change Km in Dashboard by OBD.

-With JTAG'a and option V850 we select 70F3624 (Flash, DataFlash) .Select 'Programming Mode' SPI. We make coenctions as on picture Rys.2

-We erase MCUs and write Flash . EEpromwe don't write. We do same operation for DDM and PDM.

Instal modules back to the car

RYS.1

Pull out the DDM / PDM and connect Jtag with the option V850

Rys.2
